\*Losses are as reported with no adjustments except that some years having been mapped to newer territory definitions than those that were in effect at the time.

# Glossary

## Model Parameters

|               | RMS               | AIR                                    |
|---------------|-------------------|----------------------------------------|
| Model Version | RiskLink v21      | Touchstone v9 (a.k.a Touchstone v2021) |
| Event Set     | 2021 Historical   | 100k Standard                          |
| Demand Surge  | Included/Excluded | Included/Excluded                      |
| Storm Surge   | Excluded          | Excluded                               |

## RMS Fields

| Code    | Name             | Definition                                                                                                                                     |
|---------|------------------|------------------------------------------------------------------------------------------------------------------------------------------------|
| EventID | Event Identifier | Event identification code, which represents a specific event.                                                                                  |
| RATE    | Rate             | Frequency at which a given event occurs according to the model. Also known as primary uncertainty, or the likelihood that an event will occur. |

## AIR Fields

| Code    | Name             | Definition                                                                                                                                       |
|---------|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| EventID | Event Identifier | Combination of model code, which represents event type, and event identification code which represents a specific event.                         |
| Year    | Catalog Year     | AIR uses a stochastic catalog containing potential scenarios of events in a year. The "year" field represents the simulated year in the catalog. |

## Loss Fields

| Code    | Name                 | Definition                                                                                                                                                                                     |
|---------|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| GU_Loss | Ground Up Loss       | Pure modeled loss that does not take into account limits or deductibles. These losses exclude LAE.                                                                                             |
| GR_Loss | Gross Loss           | Modeled loss taking into account limits and deductibles. These losses exclude LAE.                                                                                                             |
| wDS     | Demand Surge         | Includes amplification of losses to account for the fact that after a catastrophe occurs, demand for building materials and/or labor increases, causing the cost of those to increase as well. |
| xDS     | without Demand Surge | Demand Surge excluded.                                                                                                                                                                         |

## Windfall Parameter Fields

| Code            | Description                                                                                                                                                                                                                  |
|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Landfall State  | State in which storm made first US landfall or bypass. For events that have no landfall/bypass in the US, this field contains the country/region of first landfall/bypass.                                                   |
| Landfall County | US County in which storm made first US landfall or bypass. For events that have no landfall/bypass in the US, this field is blank.                                                                                           |
| SS_Intensity    | Saffir-Simpson storm intensity of the storm, based on wind speed at the point wind speed is assigned (below).                                                                                                                |
| WindSpeed       | Wind speed in MPH. RMS landfalling: Maximum wind speed at the 6 hourly point before landfall. RMS bypassing: maximum wind speed at the bypass gate center. AIR: Maximum wind speed at point 1 hour prior to landfall/bypass. |

| EventID | Rate       | GU_Loss_wDS    | GR_Loss_wDS   | GU_Loss_xDS   | GR_Loss_xDS   | LFState       | LFCounty       | WindSpd           | SS  |   |
